PROFESSIONAL SUMMARY

Motivated and detail-oriented B.Tech student specializing in Artificial Intelligence and Data Science with strong foundational knowledge in AI, data structure and algorithm, and programming. Passionate about solving real-world problems using data-driven approaches. Seeking an entry-level Data Science / AI Engineering internship to apply technical skills and gain industry experience.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science

Prof. Ram Meghe Institute Of Technology And Research, Amravati

I am a third year student and pursuing my B.Tech degree

CGPA upto 2 year: 8.55

12th board 2024: 78.33%

10th board 2022: 91.40%

PROJECT

Prompt Engineering & AI Prototyping

- Designed effective prompts for Generative AI models
- Converted problem statements into working AI-driven prototypes

Pure Python project : SMART FILE ORGANIZER + SEARCH ENGINE

Developed a Pure Python application to automatically organize files and perform keyword-based file searches. Implemented file handling, sorting, searching, and OOP concepts.

SKILLS

1. Technical :

Prompt Engineering,
Mathematics related to
data science
Programming Languages:
Python, R, SQL, C++
Scripting Languages :
HTML, CSS

2. Libraries & Tools:

NumPy, Pandas,
Matplotlib, GitHub, VS
code

3. Database &

Visualization: MySQL,
MS Excel

4. Soft Skills: Decision-
Making | Communication |
Teamwork | Problem
Solving | Time
Management | Quick
Learner

5. Personal Skill:

Leadership | Multitasking |
Management

NumPy project : AUDIO
SIGNAL PROCESSOR

Built an audio signal processing system using NumPy and the Wave module for waveform analysis, signal smoothing, and basic noise reduction.

Pandas project : SOCIAL MEDIA BEHAVIOR ANALYZER

Created a Pandas-based analyzer to study user activity, engagement patterns, and content preferences using data cleaning and aggregation techniques.

SciPy project : PURE SCIPY ECG SIGNAL ANALYZER

Developed an ECG signal analyzer using SciPy for signal filtering, peak detection, and heart-rate analysis.

Matplotlib and seaborn project : INTELLIGENT VISUALIZATION GENERATOR

Designed a visualization tool that automatically selects and generates suitable charts using Matplotlib and Seaborn based on dataset characteristics.

Matplotlib, seaborn and pandas project : SMART DATA VISUALIZATION RECOMMENDER

Built a system that analyzes datasets and recommends the most suitable visualizations using Pandas, Matplotlib, and Seaborn.

Major project of Python with all library : ECG ANALYZER

Developed an ECG signal analysis system for filtering, heart-rate monitoring, and biomedical signal visualization using Python libraries.

Major project of Python with libraries numpy, pandas, matplotlib : PERSONAL FINANCE ANALYZER WITH PREDICTION

Created a finance analyzer to track expenses, visualize spending trends, and predict future expenses using NumPy, Pandas, and Matplotlib.

R language project : MOVIE RECOMMENDATION ANALYTICS SYSTEM

Developed an R-based analytics system to analyze movie datasets and generate recommendation insights using statistical analysis and visualization.
